# Creating variables on UI

Creating variables using Code

```
//Global Variable
//pm.globals.set("Variable Name", "Value")
pm.globals.set("url_global_courses", "http://localhost:3000/courses/");

//Collection Variable
pm.collectionVariables.set("url_colEnv", "http://localhost:3000/courses/");

//Environment Variable
pm.environment.set("url_environ", "http://localhost:3000/courses/");

// Local Variable
pm.variable.set("url_local","http://localhost:3000/courses/");
```

# Unseting (Removing the Variable)

```
//Global Variable
//pm.globals.set("Variable Name", "Value")
pm.globals.unset("url_global_courses", "http://localhost:3000/courses/");

//Collection Variable
pm.collectionVariables.unset("url_colEnv", "http://localhost:3000/courses/");

//Environment Variable
pm.environment.unset("url_environ", "http://localhost:3000/courses/");

// Local Variable
pm.variable.unset("url_local","http://localhost:3000/courses/");
```
